1. Introduction

This document contains the eCON Console release notes for version 2.14.x.

2. List of changes

2.1. Version 2.14.0

Release date: 19/07/2023

Ticket#	Type	Change description
#11370	Implementation	<p>The new function of the eSIGN service to save mixed templates has been added. Up to the past version, the service allowed the creation of templates exclusively starting from .odt or .docx file models, with signature fields and previously configured markers inside.</p> <p>From this version, the service allows the creation of templates even with both written and empty .pdf files.</p> <p>In the case of documents in .pdf format, the user can insert, modify and configure signature or editable fields as he wishes.</p> <p>During the creation of a process from the template, unlike the signature and editable fields inserted in the documents in .docx or .odt format, they can be modified, moved and it is also possible to insert new ones.</p> <p>If the template contains empty .pdf documents, these must still be filled with a written .pdf file during the creation of the process.</p>
#11409	Implementation	<p>In the Access Management page of Entaksi's services, it has been inserted the access management section dedicated to the eNSO service.</p> <p>From this section it is now possible to:</p> <ol style="list-style-type: none"> 1. insert an user with the respective role by clicking on the "Add" button; 2. modify or revoke an user by clicking the respectively buttons in line. <p>The roles available to the user are:</p> <ol style="list-style-type: none"> 1. Service Administrator: he accesses all service functions including role management; 2. Service User: he accesses all service functions except user management.
#11410	Implementation	<p>In the Access Management page of Entaksi's services, it has been inserted the access management section dedicated to the eLUL service.</p> <p>From this section it is now possible to:</p> <ol style="list-style-type: none"> 1. insert an user with the respective role by clicking on the "Add" button; 2. modify or revoke an user by clicking the respectively buttons in line. <p>The roles available to the user are:</p> <ol style="list-style-type: none"> 1. Service Administrator: he accesses all service functions including role management; 2. Service User: he accesses all service functions except user management.

Ticket#	Type	Change description
#11411	Implementation	<p>In the Access Management page of Entaksi's services, it has been inserted the access management section dedicated to the eAMB service.</p> <p>From this section it is now possible to:</p> <ol style="list-style-type: none"> 1. insert an user with the respective role by clicking on the "Add" button; 2. modify or revoke an user by clicking the respectively buttons in line. <p>The roles available to the user are:</p> <ol style="list-style-type: none"> 1. Service Administrator: he accesses all service functions including role management; 2. Service User: he accesses all service functions except user management.
#11467	Implementation	<p>On the eSIGN service Configurations page, in the "FEA Configuration" section, in the case of FEA acceptance signature process made by link, the possibility to set its author has been introduced.</p> <p>By entering the requested data and clicking the "Save" button, the author of all FEA processes initiated via the link will be saved in the system.</p> <p>If a precise author is not specified, the author of these processes will be a generic user among those enabled for the service.</p> <p>That author will appear on the process list page.</p>
#11502	Implementation	<p>On the eSIGN service Configurations page, in the "Company Configuration" section, the possibility to configure the classification and document type as mandatory when defining the signature process has been introduced.</p> <p>Ticking the items:</p> <ol style="list-style-type: none"> 1. "Mandatory classification": the service prevents to start a signing process without having valued this field; 2. "Required document type": the service prevents to start a signing process without having valued this field. <p>The mandatory nature of these two fields is independent of each other: the user can request the mandatory of both, of only one or neither.</p>
#11509	Implementation	<p>In case of modification of the classification scheme node, where it is present, the service opens the tree list automatically on the selected node.</p>
#10235	Correction	<p>When defining an eSIGN service signature process, in case of entering a notification email to a third party user, the possibility of selecting the signatory of the phase has been inhibited.</p>
#11436	Correction	<p>Fixed some incorrect graphical displays in the various services when resizing pages.</p>
#11469	Correction	<p>The saving of a classification scheme node with a code composed of special characters has been managed.</p>
#11514	Correction	<p>In the new Console of the eCON service the possibility to generate a DIP for interoperability has been restored.</p>
#11543	Correction	<p>The display of the template editing page (left section) has been fixed in case of reduction of the visualization of the page.</p>

Ticket#	Type	Change description
#11570	Correction	Fixed the display of the "NSO" button in the Services Dashboard. This key is visible to all users, both with a "Service User" role and "Service Administrator" role.
#11572	Correction	Fixed the display of the "eAMB" menu item. This item is visible to all users, both with a "Service User" role and "Service Administrator" role.
#11576	Correction	The revocation of a company with VAT number different from the CF is now allowed on the New Console.
#11591	Correction	Fixed incorrect status display on the SIP detail page of the eCON service.

2.2. Version 2.14.1

Release date: 25/07/2023

Ticket#	Type	Change description
#11571	Correction	Restored the correct display of the page number when reloading the current page.
#11613	Correction	Restored the saving and the display of the notification settings in case of SIP loading or DIP construction.

2.3. Version 2.14.2

Release date: 26/07/2023

Ticket#	Type	Change description
#11619	Correction	Improved the management of the service to load the eCON archive tree, in order to make loading faster.

2.4. Version 2.14.3

Release date: 28/07/2023

Ticket#	Type	Change description
#11499	Implementation	The signature request behavior for FEA acceptance has been changed. By copying the link to the clipboard, the related process will be created only when the signing user has signed.
#9759	Correction	Implemented a correct visualization check of the link for FEA acceptance in eSIGN configuration. The link will be enabled exclusively if there is a template without anomalies. In case of anomalies on the template, the link is disabled with an alert icon. By hovering on this icon, a descriptive tooltip appears with the error description in order to fix it.

2.5. Version 2.14.4

Release date: 01/08/2023

Ticket#	Type	Change description
#11628	Correction	The display of the PDA archive tree with a selected node when reloading the page has been fixed.
#11634	Correction	The data updating in the PDA list when deselecting a node of the archive tree has been fixed.

2.6. Version 2.14.5

Release date: 22/08/2023

Ticket#	Type	Change description
#11465	Correction	Fixed some anomalies in case of resizing pages.
#11616	Correction	The maximum imputable length control for the additional data value field has been implemented, both from master data and from .csv file import.

2.7. Version 2.14.6

Release date: 25/08/2023

Ticket#	Type	Change description
#11593	Correction	If the description of an additional field is very long, when signing, it is displayed entirely in a tooltip next to the field to be entered.
#11690	Correction	Fixed some data visualization problems in the Access Management page for the various services.
#11690	Correction	Fixed the display of the edit and delete icons on the Access Management page of the eSIGN service. In case of an activated user or an user to be activated they are both present.

2.8. Version 2.14.6

Release date: 31/08/2023

Ticket#	Type	Change description
#11625	Correction	The correct visualization of the colors of both editable fields and signature fields of the eSIGN service has been restored.
#11654	Correction	The correct display of the mail formatting error message of the eMAN service in the digital preservation managers and company contact persons pages has been restored.
